

FANATICAL VOICES

Integrity's monthly newsletter offering goodies, special offers, tips and tricks, useful articles and latest news about Integrity and its services.

Welcome message from Warren Tan, Executive Director, Integrity Corporation

Happy Valentine's Day.

Yes, it is a little belated. There may be many of you who think that this day is nothing but an over-commercialised excuse to fleece the man on the street. However, you'll be pleased to know that we didn't raise our prices or somehow contact your better halves to suggest that they needed a new website or domain name!

Instead, in the spirit of Valentine's, we'd like to take this opportunity to thank you for spreading the love. We've truly been blessed to have incredible clients like you, who have fanatically recommended us again and again to your friends and colleagues. In fact, 95% of our business comes from your referrals. As such, in the next few months we'll be lining up rewards and events to "return the love"!

The last twelve months have seen our design and development teams being blessed with many opportunities to work on some of the world's best brands. We count this truly as a privilege. As we go full speed into 2006, we're excited to be a dynamic young company, making a difference and reinventing the Malaysian web landscape; and proving that a corporate website can not only inform your audience, but engage them and deliver results that affect your business's bottom line.

All the best in the year ahead and God bless.

Fanatically yours,

Warren Tan
Executive Director

P/S: I'm also very pleased to inform you that we have been working hard on our brand new 2006 website, and newsletter subscribers will be the first to know when we go live!

Tech Tips : Security and Privacy

We'd like to present you with simple but useful tech tips that may improve security and privacy. There may be some which you may know, and many which have not been included, but we're here to help!

When surfing the net on a public computer, remember to clear private data

Tell A Friend

Thank you!

Thank you for taking the time to read Fanatical Voices. We hope this month's issue was informative and helpful!

Please contact us at fanaticalvoices@integrity.com.

We enjoy reading your comments and suggestions.

Fanatically yours,
Fanatical Voices Editorial Team

on your web browser. You can :

- | Disable 'auto complete' feature in web browsers.
- | Disable 'remember login information' for web pages.
- | Clear cache after web browsing.

More tips to increase security and privacy :

- | Professionals would recommend using strong passwords and remembering them. But if you really do need to jot them down, avoid keeping them nearby, on your computer or in your wallet.
- | Download patches and security updates for your operating system and other desktop applications.
- | Install anti-virus software. Keep it up to date.
- | Do not execute files from unknown people. At the very least, scan it with your anti-virus software.
- | You may want to think twice before logging into secure websites at a public Wi-Fi hotspot as many are not secure. Hackers will take the opportunity to steal private information transmitted from unsuspecting Wi-Fi users.
- | Install a personal firewall.

Testimonial : Erik Fearn

Last month, I needed a comprehensive upgrade of my website, but was worried that, as a small client, Warren and his team might not have the time to help me. Not only was I treated with the attention of a big client, but the upgrade was completed ahead of schedule.

Importantly, when at the last minute, I wanted to add some minor changes, the Integricity team proved flexible, didn't charge me extra, and always kept my interests at heart.

Warren and his team at Integricity put the 'pro' in professional.
Thanks guys!
